[Speaking of saving \\$\\$\\$, Check our ECayOnline Site for weekly specials!](#)

Just because summer is over, doesn't mean your fun has to be. One of the many beautiful things about living in Cayman is that we can swim year-round.

Do the family a favor and stop in to see what's in store. With the largest selection on the island, you're bound to find something for everyone!

## *Last Month for the Summer Soak-A-Thon!*

Free Delivery, Installation, Steps, Cover and Lifter for any hot tub purchased this summer. Certain restrictions apply, but if you've ever wanted to have the luxury and relaxation that a hot tub brings into your life, **NOW** is the time!

## Question Line

**Q** : Why does it seem like my pool gets the dirty the very next day after I take all of Saturday to clean it? It's driving me mad!

**A** : We do get this from a number of customers. It's unfortunate; a bit like it always seems to rain after you wash your car. Murphy's Law at work!

Remember, your pool sits outside all day, every day. Wind is constantly blowing debris around, and it seems to always

find it's way to your pool.

Dust and spores from Africa are known to spread around the world via wind currents. There's not much we can do to fight Mother Nature.

- There are a few things to make sure are in proper order:
- 1) Make sure you have weir doors in your skimmers
  - 2) ensure that your eyeball returns are shooting the water to the surface in a clockwise manner
  - 3) run the pump at least 8 hrs./day

**HAPPY SWIMMING!**

## Para'Kito—All Natural and Chemical Free!!

Anyone who has spent any time here in Cayman knows we have mosquitoes. I've heard of stories from way back when of cattle being suffocated and nearly drained by massive swarms of mosquitoes.

We've been aware of [yellow fever, dengue fever and chikungunya fever](#). Now, we have to worry about the Zika virus. If we're fortunate not to contract any of this, we still have the itchy-scratchy discomfort of the bite itself to deal with.

Having lived in New Orleans for a few years (built on a swamp and surrounded by a lake and a river), I've seen some mosquitoes so big they should be serving peanuts on board!

The way most of us have dealt with this in the past is grabbing some can of chemicals to coat ourselves in to try to ward off the mozzies or the skeeters. Or we light odorous candles or torches to try to stink them out; but we end up stinking ourselves out at the same time.

Not to mention, do we really want to be exposing our children to all of these dangerous chemicals?

Well, we have discovered a fantastic new product that came on the market a couple of years ago called [Para'Kito](#).

Made from all natural ingredients, [Para'Kito](#) contains no DEET or other harmful chemicals that we need to be worried about. Designed and made in France, [Para'Kito](#) contains a blend of various oils known to naturally repel mosquitoes.

Now, all your child has to do is slap on one of the designer wristbands with the [Para'Kito](#) pellet and they will be protected for 15 days.

The pellets and the bracelets are completely waterproof, so it will not have to be reapplied after swimming.

Since it's not a sprayed on product, it won't run in their eyes from sweating it off by running around and playing like kids are supposed to do!

Afraid that your child won't want to wear a bracelet on their wrist or ankle? Simply attach a Para'Kito clip to their backpack or belt loop on their pants.

There are enough things in life to worry about, particularly when it comes to our children. Don't make mosquito protection one of those things.

We also offer a roll-on gel that works very well. Simply swipe it on your arms and legs and you're protected! No chemical overspray that douses everyone else to worry about. Stop in today!
